THE SIGN OF EXPERIENCE

ABOUT

TVL Engineers Pvt. Ltd. is a combination of two giants Sree Durga Fibre Products & S.D. International. We provide quality products in the Wood Polymer Composites (WPC) sector. For the first time in India, we've brought European technology to produce WPC boards. 'Floresta', our brand is a superior quality product.

WPC stands for composite panels made from a combination of fine quality polymer with wood dust and lubricants along with other chemicals. At our state-of-the-art manufacturing facilities, we use the best quality equipment along with the top-notch raw materials to give you the best WPC Boards. Our products are offered not only value-for-money, but quality-wise are the best in the market. Furniture made from our products is sure to win hearts with original grade quality made of wood dust and displaying the characteristics of actual wood.

European technology first time in India

Floresta is a Wood Polymer Composite board (WPC) product made from the finest quality raw materials using European technology. Furniture made with it is as close to the actual wood furniture as can be possible. With fire-retardant characteristics, it is totally water, moisture, termite and borer-proof. It not only looks like wood but also works like wood. A next generation product, it can withstand heavy pressure and can be pierced with nails and screws. It is eco-friendly, durable and easy to use.

TVL Engineers Pvt. Ltd. aspires to be the most superior name in the WPC segment industry. Our quality should be a benchmark for other manufacturers to emulate.

To achieve our vision of superior quality and reach, we will make quality a basic requirement. No product will pass out of the company's systems without a total guarantee of fulfilling what it promises to the customer.

A Total Substitute to plywood
